

Office Memorandum • UNITED STATES GOVERNMENT

TO : Hal Goodwin, National Security Resources Board DATE: 404918

FROM : Ward Miller, Jr., Civil Defense Liaison Branch, AEC

SUBJECT: REVISION OF MEDICAL ASPECTS PAMPHLET

SYMBOL: BMC:WM

The revisions to the subject publication proposed in your memo of July 19, 1950 have been approved by the appropriate Atomic Energy Commission personnel and by the Department of Defense.

In addition, there are several ^{minor} textual revisions which we wish to have included in the edition about to be printed. These appear at pages 16, 17, ^{20, 21, and 22}, as indicated in the conformed copy attached hereto, and also have the concurrence of the ~~Department of Defense~~ ^{and were discussed by Dr. Harbin of this Division and Dr. Anderson, NSRB this morning by telephone.}

It would be appreciated if you would arrange for the AEC to receive 250 copies of the reprinted pamphlet.

~~also, it is suggested that you may wish to change the notation on the inside cover to reflect Mr. Symington's chairmanship. It is felt that the date of this revision should be included; also a footnote at page 3 to ~~indicate~~ indicate the scheduled publication of "The Effects of Atomic Weapons".~~

RP My apologies for the untidy condition of the proofed-over pamphlet; in the interest of haste I am sending it on as is.
